

REDUCE COMPLIANCE COST AND STAY AHEAD OF THE THREATS

MANAGED SECURITY SERVICE

Overview

Expensive information security products and the myriad of logs they generate are not enough to protect an organization from compromise, unless complimented by expert management from dedicated resources.

Zadyn Group's Managed Security Operations offer a comprehensive vision coupled with the availability of dedicated and experienced resources. This enables you to execute against your security strategy or offload the burden of managing complex security tools. We can offer tactical support that allows you to outsource certain areas of your security operations in a cost-effective manner.

Zadyn Group brings to the table years of experience across high profile accounts and the means to integrate these capabilities into different environments. We can ensure a smooth and well-documented management changeover that safeguards the continuity of your security operations.

Benefits to your organization

Stay Ahead of Threats

Reduce Costs

Improve Productivity

Align Security & Strategy

Reserve Capabilities

Simplify Compliance

Strategic

Our Strategic Security Management Solution offers a holistic approach to ensure that best practices are put in place. We act like your Virtual Security Operations Centre and work to align information security with your business goals. From architecture and policy development to procurement, deployment, and management, we offer seamless security in support of your corporate strategy.

Tactical

Tactical Security Management Solutions are focused on specific elements of security management to compliment your internal capabilities. Our tactical solutions are ideal for outsourcing certain areas of information security management. This allows you to direct resources into other areas of your organization.

Compliance Focused

Complying with security standards such as PCI DSS, PSPF/ISM, ISO27001, ITIL, Sarbanes-Oxley as well as, internal standards and requirements can be a challenging process. Our Managed Compliance provides a cost-effective solution that allows your organization to achieve, maintain, and prove compliance.

Scope of the Service

SIEM & Security Event Management

Reduce thousands of security events into a visible and manageable list of possible indicators of compromise.

Firewall Management

Manage legacy and Next Generation Firewalls at a predictable monthly cost.

Mail Gateway Management

Follow best practices in deployment and management of Mail Gateways.

Web Gateway Management

Simplify administration, lower the total cost of ownership, and gain visibility to user behavior.

Endpoint Protection Management

Avoid costly virus propagation and stop malware threats in their tracks.

URL and Content Filtering

Monitor the implementation of Internet policies and acceptable Internet usage.

Business Support Plus

Comprehensive hardware and software services to increase the availability of your infrastructure.
